

AI Magik Mentorship – Welcome Packet

You're In

Your mentorship is confirmed. Your spot is reserved for the next 4 weeks starting from your **first booked session**.

Book it now. Don't wait. The clock doesn't start until that first call, but your access window is limited.

What Happens Next

1. Book Your First Session

Use the link provided on your thank-you page to grab your time slot.

Sessions are 60–75 minutes on Zoom (or similar).

Have your AI tools and accounts ready before we meet.

2. Prepare Your Setup.

- Have access to your chosen AI models (ChatGPT, Claude, Poe, local models, etc.).
- If you don't have them yet, set up accounts now.
- Make sure you can screen-share during our calls.

3. Have a Goal in Mind

You don't need a perfect plan — that's why you're here.

But know what area of your magik practice you want AI to amplify first.

4. Stay Available

You have messaging access between sessions (Mon–Fri 12-8pm eastern).

Use it for quick questions, prompt troubleshooting, or feedback. Messages through a special link to be provided once we begin.

Ground Rules

- **You book your own sessions.** If you skip a week, it's gone.
- No rollovers. No chasing. If you vanish, that's on you.
- Come prepared — this is work, not a casual chat.
- All material we create together stays between us.
- If I determine this is not a fit at any time in Week 1, I reserve the right to refund and close the mentorship.

For VIP Students

If you purchased the VIP tier:

- We'll define your custom servitor in the first session.
- Two extra follow-up calls must be used within 90 days of your first booked session.

Before Session One

- Clear your workspace.
- Have your AI login(s) ready.
- Bring any notes or previous AI-magik work you've done.
- Be ready to execute in real time — we'll be building, testing, and adjusting on the spot.

You committed to this. Show up. Execute.

This is where AI becomes an active ally in your magik — and where you stop working inside the system's limits.
