Goddess Sigils

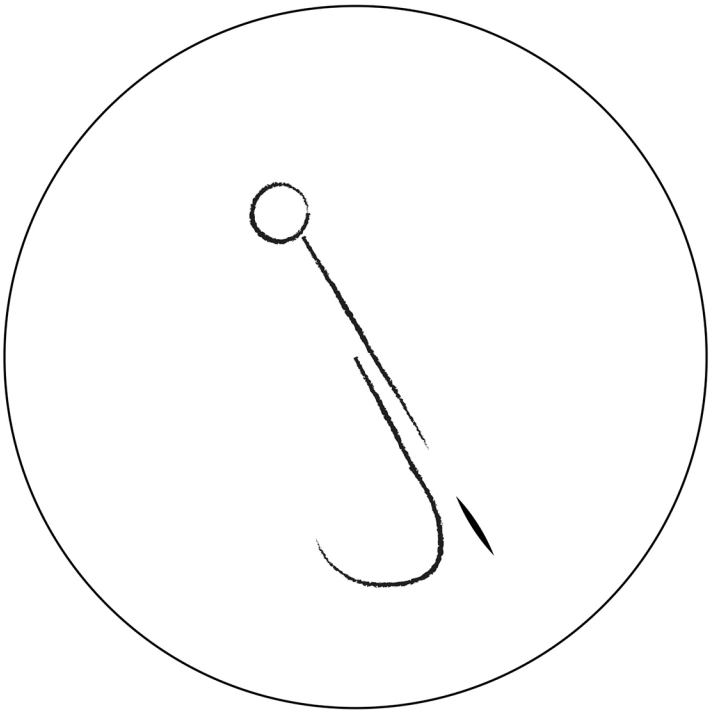

The sigils are activated and will be useful in any ritual performed from this book.

Although activated, you will also need to attune these sigils to your own energy. This is a simple process and is done in a very easy ritual.

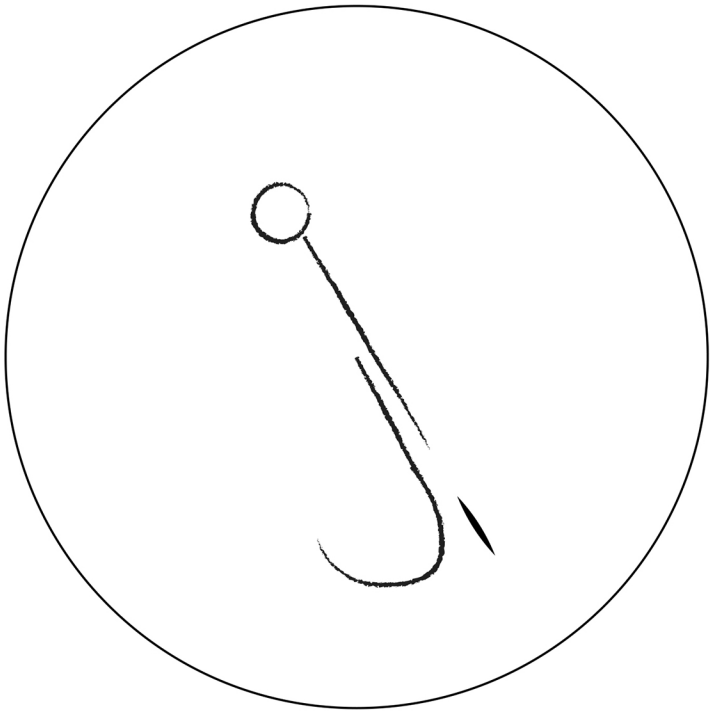

You will need a single candle and frankincense. Light the candle and charcoal. When the frankincense is smoking well, hold the printed sigil, or permanent talisman, over the incense smoke and visualize your own energy, gold or purple in color, flowing from your hand and into the sigil. Hold this for only a moment. Do this for each sigil you have printed or have had made into a talisman.

With a permanent talisman, you will usually need to activate it once every three to four months.
